

# CINEMA SOLUTIONS

## INFLATABLE PROJECTION SCREENS

An inflatable cinema screen is a versatile and convenient product designed for outdoor entertainment. It features a large, smooth viewing surface, inflates quickly with an electric blower, and is made from durable, weather-resistant materials. Lightweight and easy to transport, it includes tie-downs and anchors for stability, making it ideal for movie nights, parties, and community events.

- Sizes: 2.5m-10m+ to suit audiences for backyard, community or drive-in events
- Easy to inflate with quick setup time

## FAST-FOLD SCREENS

A fast fold projection screen is a portable and professional-grade screen ideal for presentations, events, and conferences. It features a sturdy foldable frame that sets up quickly without tools, with a wrinkle-free screen surface for clear, sharp images. Designed for easy transport and storage, it offers reliable performance and convenience for both indoor and outdoor use.

- Quick and easy tool-free setup - no power required
- Lightweight and portable with travel case
- Tensioned surface provides for sharp image quality

## LED SCREENS

An LED cinema screen is a high-performance display solution designed for vibrant, ultra-bright visuals in any lighting condition. It offers seamless, high-resolution imagery with excellent color accuracy and contrast. Built for durability and long-term use, it features a modular design for flexible installation and minimal maintenance, making it ideal for both indoor and outdoor cinema experiences.

- Bright, vivid display perfect for daytime or high-ambient light environments
- Weather-resistant design with high durability for outdoor use

## PROJECTORS

We offer a range of projectors to suit every type of outdoor cinema setup, from backyard movie nights to large-scale public events. Our projectors vary in brightness and resolution to match different screen sizes and lighting conditions, ensuring a clear, vibrant picture even in low-light environments. Whether you need a compact, portable option or a high-powered commercial-grade projector, we have models to suit.

- Full HD and 4K options
- Varying brightness levels (3,000–10,000+ lumens)
- Easy connectivity with HDMI, USB, and wireless

## SPEAKER AND AUDIO SOLUTIONS

We provide a variety of speaker and audio solutions designed to deliver clear, powerful sound for outdoor cinema events of all sizes. From compact wireless speakers for small gatherings to professional PA systems for large crowds, our setups ensure your audience can hear every word and soundtrack with clarity. Our systems are easy to set up, weather-resistant where needed, and compatible with all standard cinema equipment, offering reliable performance and immersive audio in any outdoor setting.

- Wireless and wired options available
- Options to suit audience sizes, output, and budget

## ACCESSORIES

We supply a full range of outdoor cinema accessories to help you run smooth and professional events. Our accessories include durable projector travel cases for safe transport, high-quality cables for reliable connections, and sturdy projector stands that are adjustable and easy to set up. These essential extras are designed to make your setup more efficient, organised, and hassle-free, whether you're hosting a one-off screening or managing regular outdoor movie nights.

## BUILDING PROJECTION

We provide projection solutions tailored for buildings and silos, ideal for public art, community events, or immersive advertising. Our systems are built to handle long-throw distances and uneven surfaces, delivering sharp, eye-catching visuals in outdoor or industrial settings. From portable setups to fixed installations, we can match the right projector and lens for your needs.

- Supports warped and mapped surfaces
- High brightness for large-scale projection
- Customisable media players and control systems

## INDOOR PROJECTION

Yes, we can also supply projection systems for indoor use, perfect for conferences, classrooms, exhibitions, or home theatres. Our range includes models suited to various room sizes, lighting levels, and screen types—delivering clear, vibrant images in controlled environments. From ultra-short-throw to high-lumen options, we offer flexible solutions for any space.

- Full HD and 4K resolution available
- Fixed frame and retractable screen options
- Individual products and full solutions available

## INFLATABLE TENTS

Inflatable tents designed for rapid deployment across a wide range of outdoor applications, including emergency response, medical stations, event shelters, and temporary workspaces. These structures are built for quick inflation and easy transport, with durable materials that withstand varied weather conditions. Once set up, they provide a stable, enclosed environment that can be customised for different operational needs, including lighting, ventilation, and partitioning. Sizes range from compact units for small teams to large-scale shelters.
